CHINONSO EZEIGBO

UI/UX Designer | Product Design | Design Systems | Accessibility (WCAG 2.1 AA)

Newcastle upon Tyne, UK • +44 7350 156605 • **godswill.ec@gmail.com** • Portfolio: **designbynonso.co.uk**

PROFESSIONAL SUMMARY

UI/UX Designer with 4+ years of experience designing SaaS, mobile and web products, from user research and wireframing to high-fidelity prototypes and Figma design systems. Built a token-based design system that cut developer handoff time by 50%, and redesigned an e-commerce checkout that raised mobile orders by 34%. Completing an MSc in Cyber Security at Aston University, bringing expertise in WCAG 2.1 AA accessibility, GDPR and Privacy-by-Design. Experienced in Agile, cross-functional teams across the UK and US.

SKILLS

- **UX Research:** User Interviews, Usability Testing, Heuristic Evaluation, A/B Testing, Personas, Empathy Mapping, Journey Mapping, User Flows
- **UI Design:** Wireframing, Prototyping, High-Fidelity UI, Mobile-First Design, Responsive Design, Interaction Design, Micro-interactions
- **Design Systems:** Figma (Auto Layout, Variables, Variants, Components), Design Tokens, Component Libraries, Design Specs, Developer Handoff
- **Accessibility & Compliance:** WCAG 2.1 AA, Inclusive Design, GDPR, Privacy-by-Design
- **Tools & Methods:** Figma, Adobe Creative Cloud, Jira, Teamwork, Agile/Scrum, HTML/CSS, React (handoff)

PROFESSIONAL EXPERIENCE

UI/UX Designer | **Appsatile Ltd** — Gateshead, UK (Remote) | Mar 2023 – Feb 2026

Contract, Mar 2023 – Nov 2025; Part-time, Nov 2025 – Feb 2026

- Built and maintained a Figma design system for a SaaS product suite, providing reusable component libraries for 3 product squads.
- Designed a 3-tier design token structure (colour, typography, spacing) mapped to CSS variables and React props, cutting developer handoff time by 50%.
- Designed all components to meet WCAG 2.1 AA, including accessible colour contrast and visible focus states.
- Validated user flows with stakeholders through high-fidelity interactive prototypes before engineering sprints, reducing post-release rework.
- Ran weekly backlog grooming, design reviews and QA pairing sessions with engineers using Jira and Teamwork.

UI/UX Designer (Full-time) | **Talstrike** — United States (Remote) | Jul 2024 – Dec 2024

- Identified key drop-off points across web and mobile through user research, heuristic evaluations and journey mapping.
- Turned usability testing insights into iterative wireframes, improving feature engagement and task completion.
- Delivered production-ready prototypes in bi-weekly Agile sprints with cross-functional international teams.

Freelance UI/UX Designer — UK & International | 2022 – Present

- **Nikos Farm (e-commerce):** Redesigned the mobile shopping experience with a slide-out cart and product origin badges, increasing mobile orders by 34% and reducing cart abandonment by 44%.
- **Cooked by Ugo (food ordering):** Designed a direct takeaway ordering platform with a 90-second checkout, increasing direct orders by 45% and reducing third-party commission costs by 30%.
- **LazyZoneLabs (AI creator tool):** Designed a browser workspace combining script writing, audio and video editing in one adaptive screen, reaching an 88% video completion rate and cutting production time by 42%.

User Experience Designer (Full-time) | **Cloudnet IQ Labs** — Remote | Nov 2020 – Mar 2022

- Created personas, empathy maps, sitemaps and low- to high-fidelity prototypes for client products.
- Ran usability audits and user interviews to find navigation friction and guide product improvements.
- Partnered with front-end developers during QA to ensure designs were implemented accurately.

EDUCATION

MSc Cyber Security | Aston University, Birmingham, UK — Sep 2025 – Oct 2026

- Focus: Security-by-Design, Privacy UX, GDPR

BSc Computer Science (Second Class Upper, 2:1) | Adeleke University, Nigeria — Sep 2019 – Jun 2023

CERTIFICATIONS

- Google UX Design: Conduct UX Research and Test Early Concepts
- Google UX Design: Empathize, Define, and Ideate
- Udemy: Ultimate DevOps Bootcamp
- Google UX Design: Build Wireframes and Low-Fidelity Prototypes
- Google: Foundations of Cybersecurity
